OBJECTIVE

Aspiring Software Engineer with a strong foundation in both front-end and back-end development technologies. Seeking an IT internship to enhance technical skills, gain practical experience, and contribute to innovative projects.

EDUCATION

BProf Computer Science Operational Engineering, University of Szeged Expected 2025
Relevant Coursework: Frontend Developer, Fullstack Developer

Graduation, Lehel Vezér Gimnázium 2013 - 2021

SKILLS

Frontend Skills	HTML, CSS, TailwindCSS, React, Angular, JavaScript, TypeScript
Backend Skills	Python, Node.js, PHP, MySQL, MongoDB, Firebase
Other	Git, Gitlab, Figma, Trello, ChatGPT
Soft Skills	Communication, Teamwork, Flexibility, Problem-Solving, Agility
Language Skills	English (Intermediate), Hungarian (Native)

EXPERIENCE

3D measurment laboratory assistant Jun 2022 - Present
FORVIA Faurecia *Jászárokszállás*

- Supported engineering projects through data collection and analysis.
- Enhanced proficiency in Microsoft Office Suite and team collaboration tools.

PROJECTS

Social Media Webapp - 2024.

Developed a Twitter-inspired social media application using Node.js and MongoDB for backend and React with TailwindCSS for the frontend. Implemented user authentication and real-time data handling. Deployed using AWS services.

Who Wants to be a Millionaire? - 2023

Part of a team recreating the game show as a web application. Focused on UI design and responsiveness, leading the frontend development with Angular and Firebase for real-time data updates.

Clothe Webshop - 2023.

Created an e-commerce platform for a fictional clothing store. Utilized Angular and TypeScript for frontend and Firebase for backend to manage product listings and transactions.
